

Work **VIRTUALLY** anywhere...

Work anywhere, **VIRTUALLY!**[™]

GoToMyPC vs. VOS[™]

Comparing GoToMyPC to VOS[™] is like comparing regular mail to e-mail. Both are capable of delivering information but the “old” method is much more expensive, time consuming and cumbersome than the new process.

Here’s how the two solutions compare:

| GoToMyPC | VOS [™] |
|---|-----------------------------------|
| Requires 2 computers | Any computer with Internet access |
| High speed Internet at home and work | |
| GoToMyPC subscription expense | |
| Utility power at home and work | |
| Battery backup power | |
| Surge protection at home and work | |
| Software installed at home and work | |
| Operational network at the office | |
| Office computer has to be left on | |
| Anti-virus protection on both computers | |
| Manage multiple security credentials | |
| Backup solution for office computer | |
| Maintenance on home and work computers | |
| Tech support for computers & software | |
| Expense for Microsoft® Office and upgrades | |
| Healthy operating system on the work pc | |
| | |

VOS[™] is clearly the superior solution. VOS[™] is dramatically less expensive and it is simple to use. Free Microsoft Office[®] upgrades, data backups, secure remote access, around-the-clock technical support and **more** contribute to making VOS[™] the best choice and the best value on the market today. How much money will you pour down the drain before you make the switch? Don’t delay!
