VOS™ Shocks B2B Expo with Stunning Security Demo

United States 30, June 2009 – VOS™ silenced the B2B Expo crowd during a live demo on the main stage when the VOS™ presenter let a laptop computer fall to the floor with a thunderous crash. The crowd was stunned by what appeared to be a catastrophe- the complete loss of a business computer. The staged “accident” demonstrated the value of VOS™ [service](#) to businesses. Far superior to any [backup solution](#), files and data with VOS™ are not stored on the local computer where they would be vulnerable to loss from computer failure, damage or theft.

“It is critical that businesses know VOS™ can deliver superior [security](#) at less cost,” Sales Manager Aron Derstine says. “The convenience and ease of use is icing on the cake.”

VOS™ offers dramatic [savings](#) by providing Microsoft® Office, Microsoft® Outlook email, name brand accounting program and more for just over \$2/day per person on average. VOS™ clients access their programs and files simply by browsing the Internet. VOS™ services support low cost home offices, mobile workforces and easy business expansion at a fraction of the typical cost associated with traditional server hardware and related expenses.

VOS™ brings a revolutionary change to business with [technology](#) that delivers full version, name brand business software to organizations in a manner that is simple and familiar to anyone who has used the Internet. Unlike many “web” software versions, programs provided by VOS™ look and feel like locally installed programs. Since there is nothing new to learn, businesses get immediate results with VOS™.

VOS™ deploys ultra high-performance systems and replaces hardware regularly to maintain peak responsiveness and speed of hosted programs. VOS™ certified engineers maintain programs and files in world-class data centers to ensure maximum protection and [reliability](#).

With VOS™, there is no longer any need to buy or upgrade server hardware. Businesses can manage expenses with predictable monthly technology costs. Data protection, reduction of [maintenance](#) costs and managed backups further reduce the burden of technology on businesses with VOS™ service.

For additional information contact [Aron Derstine](#) or visit <http://www.GETVOS.com>.

June 30, 2009

ABOUT VOS™:

VOS™ alleviates the financial and operational burden of technology from small to mid-size businesses by hosting and maintaining programs and data. VOS™ makes the end-user experience of running programs, storing data and sharing information as easy as browsing the Internet.

VOS™ service offerings include Microsoft® Office, client program hosting, program maintenance, secure data storage, remote access, daily backups, 24x7 technical support and more. The low cost makes the service affordable for any size business.

VOS™ maintains state-of-the-art systems in world-class data centers to provide maximum security, exceptional reliability and premium service.

VOS™ is a privately held company established in 2002 with headquarters in Columbus, Ohio. With clients throughout the United States, Canada, Mexico, and countries around the globe, VOS™ continues to grow rapidly both domestically and internationally.
