Updated March 2009

VOS™ has a comprehensive suite of services that can be tailored to meet the needs of your business. No need to buy or upgrade a server. No need to worry about backups. No complicated, slow, (or lack of) remote access. VOS™ is affordable, simple to use, and includes features like the ability to create PDF (Portable Document Format) files of your documents among other exceptional features!

VOS™ is the premier online service provider of Microsoft® Office, Microsoft® Exchange email with Microsoft® Outlook, popular accounting software, and other industry leading software programs. VOS™ can host your programs and data, deliver consistent speed and reliable service all for a low monthly service fee.

The typical VOS™ customer has Microsoft® Word 2007, Excel 2007, PowerPoint 2007, accounting software package, and Microsoft® Outlook email including backup, email protection, free upgrades and more- all for a little over $2 per day! And they are able to access their programs and data from virtually anywhere there is Internet access!

Why is the ability to create PDF files important? Protecting intellectual property and preserving the integrity of your documents are a couple good reasons. Did you know that when you email an excel worksheet the recipient can change the formulas and calculations? Or how about lengthy contracts drafted in Word that someone might alter without your knowledge? PDF files are an important business tool. VOS™ recognizes that need and provides the resources as part of their Hosted Programs solution- at no extra charge.

VOS™ offers a unique solution- one that you have probably never seen before. Find out why there is so much interest in VOS™ services. Contact Sales and schedule a demo to *see* the difference and learn more about the VOS™ array of business solutions!
