

Work **VIRTUALLY** anywhere...

Work anywhere, **VIRTUALLY!**[™]

VOS[™] - Religious Organization's Technology Solution

VOS[™] provides the resource that religious organizations need in a manner that is consistent with their mission. Instead of struggling with outdated computers and old programs, religious organizations can use VOS[™] services with current software and enhanced resources. Additionally, the organizations can avoid the cost associated with buying and maintaining a server. In either regard, VOS[™] is a great fit!

Primary Decision Drivers:

- ❖ **Mission** – Computer resources are necessary, but should not detract from the purpose and initiatives of the organization.
- ❖ **Finance** – Regardless of how well funded an organization may be, donors and directors want to spend money where it does the most to support their mission.

VOS[™] provides software like Microsoft[®] Word, Microsoft[®] Excel, Microsoft[®] Outlook email with Microsoft[®] Exchange Server, and other business programs directly through a secure website. The low monthly fee for service preserves a significant amount of money that can be directed to other, more important purposes that support the mission of the organization!

- Work from nearly any computer with Internet access
- Free upgrades on Microsoft[®] Office programs
- Daily Backup of your programs and data
- Consistent speed and responsiveness
- Predictable monthly service fee
- Secure data storage
- 24 x 7 support line
- and MORE!!!
