VOS™ is going to change the way you run your business!

Step 1: **Get on the Internet**

Step 2: **Login**

Step 3: **Access your programs and files.**

It's that easy.

With VOS™, it really is that easy to run your business.

Traditionally businesses own file servers, tape drives, battery backups, and all the other related equipment that goes with it. Furthermore, businesses pay technicians to come out and maintain it.

With VOS™, all you need is a computer and Internet access.

Running your programs look exactly the same as they always did. For your employees, nothing really looks different. There's nothing new to learn.

The business no longer has to purchase servers every 4 years and pay for ongoing maintenance.

VOS™ enables businesses to have a predictable monthly I.T. budget.

VOS™ makes the programs your business uses available to any computer with Internet access. Your files are kept in world-class data centers. Your data is secure and backed up in multiple locations. You have a team of certified technicians available to you 24/7.

In summary:

- You get on the Internet and work (home, seminars, customer sites, vacation, etc)
- Everything looks and feels the same
- You no longer buy or upgrade servers
- You always have the most current Microsoft® Office programs installed for you
- You have a predictable monthly fee

Visit our website at www.GETVOS.com or call us at 877.2TRY.VOS or (614) 436-2921

We are excited to tell you about VOS™!
