

FOR IMMEDIATE RELEASE

VOS™ Crash for Junkers Technology Stimulus

United States 8, September 2009 – VOS™ business hosting solution boosts new startups by providing computer resources with [\\$0 capital investment](#) in server hardware. VOS™ promotes growth of existing companies through dramatic cuts in IT expenses. The VOS™ “No Server” solution provides fully managed software, licensing, security, storage and support; clients need only a computer with Internet to securely access their resources from anywhere.

“Due to tough economic times, companies are neglecting file servers that store vital customer information”, says Aron Derstine, Sales Manager. “Many systems are just moments away from a fatal system crash and pose a grave threat to the business.”

VOS™ hosting services cover the core technology functions that are critical for responsible business operation. VOS™ maintains servers in geographically separated data centers to securely store client programs and files. Businesses no longer need to worry about [backups](#). VOS™ system architecture provides the essential protection against data loss.

VOS™ makes connecting remote sites and [mobile office](#) workers simple, affordable and safer than ever before. Company programs and data are stored at VOS™, instead of local computer or notebook drives that could be lost, stolen or otherwise fail. Login credentials, data encryption, firewalls, and other security measures deliver enterprise grade protection to any size business.

Access to current, [hosted applications](#) at VOS™ is as easy as connecting to the Internet. Users login and work using a simple process that is familiar to nearly anyone that uses a computer and the Internet.

Certified engineers maintain VOS™ systems equipped with the latest skills and resources to deliver an ultra-reliable and responsive environment. VOS™ pursues an aggressive hardware refresh policy to ensure the best end-user experience for clients. Proactive maintenance and 24hr monitoring ensure uninterrupted, quality service.

VOS™ supports customers with round-the-clock help desk services. Friendly, knowledgeable customer service representatives are readily available to VOS™ users if ever they need assistance.
